Your GPS Navigator at a glance

Using the mounting cradle

- Do not operate the device while driving.
- Please select an appropriate location on the dashboard or windshield where the device will not obstruct driver field of vision.
- Make sure that the device has a clear view of sky to attain best GPS reception.

Please follow procedures below to operate mounting cradle:

1. Place device on the bracket with bottom positioned on the appropriate socket.
2. Push on the top edge to securely install device onto the cradle.
3. Lift the suction cup lever and press the suction cup at desired location.

location.

4. Press down the suction cup lever to secure the mounting cradle on the surface.
5. Rotate the knob to adjust device to desired viewing angle.

To Dismount Device

1. Push the tap on top of the mounting cradle to release the device.
2. Lift the suction cup lever to easily remove the suction cup from windshield or dashboard.

Charging your GPS

Connect your GPS to the vehicle accessory/cigarette socket by using the included USB cable and car charger.

Please connect the car charger to vehicle 12V accessory/cigarette socket after vehicle engine is started to protect the device from sudden surges in current.

Stylus

While the first time you turn on the GPS navigator, you are asked to do calibration for the stylus. Thus, strokes or taps by the stylus will be precisely displayed on the screen. (Or go to **Settings** to do calibration).

Getting started

Press and hold the power key to power on your GPS.

Home screen

Your Home screen is the starting point to access all of the GPS navigator's features.

General operations

- Tap  or  to select your desired function on the Home screen.
- Go to **Settings**, Tap  or  to go to previous or next page.
- Tap  to exit and return to your Home screen.

Start GPS navigation

1. Press and hold the power key to power on your GPS.
2. Tap  or  to select .
3. Tap the icon to start GPS navigation.

GPS

When **Prestigio GeoVision** is started the first time, you need to select whether to start the program in Simple mode or in Advanced mode.

The two operating modes of **Prestigio GeoVision** mainly differ in the menu structure and the number of available features. The controls and screen layouts are the same.

- Simple mode: you have easy access to the most important navigation functions and the basic settings only. The rest of the settings are set to values that are optimal for typical use.
- Advanced mode: you have access to the full functionality of Prestigio GeoVision.

This Guide covers actions in Simple mode. See the User Manual for detailed instructions on both modes.

Later you can switch between the two operating modes:

- To switch from Simple mode to Advanced mode: on the

startup screen (Navigation Menu), tap , .

- To switch from Advanced mode to Simple mode: on the startup screen (Navigation Menu), tap , .

Navigation Menu

After selecting Simple mode, the Navigation menu appears. From here you can reach all parts of Prestigio GeoVision.

The Navigation menu contains the following options:

- Tap  to specify an address as your destination.
- Tap  for the list of recent destinations.
- Tap  to select one of the stored Points of Interest.
- Tap  for the list of your favourite destinations.
- Tap  to navigate or to browse the map.
- Tap  to customise the way **Prestigio GeoVision** works.
- Tap  to stop navigation, and exit **Prestigio GeoVision**.

In the Navigation menu, tap . By default, **Prestigio**

GeoVision proposes the country/state and settlement where you are. If needed, tap the button with the name of the country/state, and select a different one from the list. If needed, change the settlement:

- To select the settlement from the list of recently used ones, tap the  button.
- To enter a new settlement:

1. Tap the button with the name of the settlement, or if you have changed the country/state, tap .
2. Start entering the settlement name on the keyboard.
3. Get to the list of search results:
 - After entering a couple of characters, the names that match the string appear in a list.
 - Tap  to open the list of results before it appears automatically.
4. Pick the settlement from the list.

Enter the street name:

1. Tap .
2. Start entering the street name on the keyboard.
3. Get to the list of results:
 - After entering a couple of characters, the names that match the string appear in a list.
 - Tap  to open the list of results before it appears automatically.
4. Pick the street from the list.

Enter the house number:

1. Tap .
2. Enter the house number on the keyboard.
3. Tap  to finish entering the address.

The map appears with the selected point in the middle. Tap  from the Cursor menu. The route is then automatically calculated, and you can start navigating.

EN

On the Map screen, tap  to return to the Navigation menu.

In the Navigation menu, tap .

Select the area around which the POI should be searched:

- : The POI will be searched around a given address.
- : The POI will be searched around the Cursor.
- : The POI will be searched around the current GPS position.
- : The POI will be searched around the destination of the active route.
- : The POI will be searched not around a given point but by the size of the detour it means from the active route. This can be useful if you search for a later stopover that causes only a minimal detour. For example upcoming petrol stations or restaurants. After this, the list of POI categories appears.

You can narrow the search with the following:

- Select the POI group (e.g. Accommodation), and after that, if needed, select the POI subgroup (e.g. Hotel or Motel).
- To find the POI by its name, tap and use the keyboard to enter a part of the name.
- To list all POIs in a given POI group, press and then without entering any letters of its name.

[optional] When finally the list of results appear, you can change the list order with the or button. Tap the desired POI in the list.

The map appears with the selected point in the middle. Tap  from the Cursor menu. The route is then automatically calculated, and you can start navigating.

Map Screen

The most important and most often used screen of Prestigio GeoVision is the Map screen. The map looks similar to a conventional road-map. The blue arrow represents your current position, and the green line shows the recommended route. There are several screen buttons and data fields on the screen to help you navigate. Their functions are explained in detail in the User Manual.

During navigation, the screen shows route information and trip data (left screenshot), but when you tap the map, additional buttons and controls appear for a few seconds (right screenshot). Most parts of the screen behave as buttons.

 or  : Switches between 2D (classic top-down view) and

3D (perspective view for navigation) map modes.

 : Opens the Navigation menu.

If you have moved the map, a  button appears. Tap this button to move the map back to the current GPS position.

Technical Specifications

Item	Specification
GPS Receiver	MT3328
Processor	MT3351C ARM-11 CORE , 468MHz
RAM	128MB DDR3
Display	5" TFT touch LCD
Resolution	480 x 272 pixels
Storage capacity	4 GB flash memory, Memory card slot supports micro SDHC card up to 8 GB
Interfaces	USB 2.0, Micro SD (micro SDHC compatible)
Battery	850 mAh Li-Polymer battery
Dimensions	131.8 x 92 x 10.3mm (L x W x H)
Weight	160 g
Storage Temperature	-10°C ~ +60°C
Operation Temperature	0°C ~ +50°C

Operation Relative Humidity	45% ~ 80% Non-Condensed
-----------------------------	-------------------------

Storage Relative Humidity	30% ~ 90% Non-Condensed
